هل سيتم فحصي للكشف عن كوفيد-19 قبل الإجراء الخاص بي؟
Will I be tested for COVID-19 before my procedure?
نعم. نريد أن نتأكد من أنك بصحة جيدة في يوم إجراءك حتى تتمكن من التعافي بشكل جيد. سيتم فحص جميع المرضى الذين تم جدولتهم لإجراء ما للكشف عن كوفيد-19 قبل الإجراء. سنستمر في هذه الممارسة حتى تعود غير ضرورية للسلامة.
Yes. We want to make sure you are healthy on the day of your procedure so that you can recover well. All patients who are scheduled for a procedure will be tested for COVID-19 before the procedure. We will continue this practice until it is no longer deemed necessary for safety.

متى ساخض للفحص؟
When will I be tested?
 سيتم فحصك من 48 إلى 96 ساعة قبل الإجراء الخاص بك. يتبع لك ذلك وقتاً كافياً لإجراء الفحص والحصول على النتيجة قبل الإجراء. كما أن الفحص قريب بما يكفي من وقت الإجراء الخاص بك حيث تقل مخاطر تعرضك لشخص مصاب بـ كوفيد-19 في المجتمع في الفترة الفاصلة بين الفحص والإجراء الخاص بك. نتائج الفحص جيدة فقط لمدة 96 ساعة قبل تاريخ وقتم الإجراء الخاص بك. سيتم علاج بعض المرضى إعادة الفحص قبل إجراء العملية.
You will be tested 48 to 96 hours before your procedure. This allows enough time for you to have the test and get your result before the procedure. It is also close enough to your procedure time that your risk of being exposed to someone with COVID-19 in the community in the time between the test and your procedure is decreased. Test results are only good for 96 hours before
Where will I be tested?

Where will I be tested? 

In the event of the medical procedure unit staff will help you choose a Michigan Medicine location or a location closer to you. You will need to have an appointment at the drive-thru site to be tested. You can also look for local facilities with the Michigan Medicine COVID testing locator: [http://michmed.org/xoWVR](http://michmed.org/xoWVR).

When will my results be available?

When will my results be available? 

If you use one of Michigan Medicine's drive-thru testing sites, your results will be available 24 to 48 hours after the test was completed. The result will appear in your portal. If the result is positive, someone from your doctor's office will call you to discuss it.

If you are tested at a different location closer to your home, your doctor will work with the testing location to get your result. If it is positive, someone from your doctor's office will call you once the result comes in.

How do I make sure I don’t get COVID-19 between the test and the procedure?

How do I make sure I don’t get COVID-19 between the test and the procedure?

If you use one of Michigan Medicine's drive-thru testing sites, your results will be available 24 to 48 hours after the test was completed. The result will appear in your portal. If the result is positive, someone from your doctor's office will call you to discuss it.

If you are tested at a different location closer to your home, your doctor will work with the testing location to get your result. If it is positive, someone from your doctor's office will call you once the result comes in.
We strongly recommend that you isolate yourself from others in the time between your COVID-19 test and your procedure. This will give you the best chance of staying healthy on the day of your procedure.

Isolating yourself means:

- That you stay home, and stay in a different room from others in your home as much as possible.
- You do not go:
  - Outside where you live: Out in public, to the outside, to the store, to parks, to work.
  - To public places: To the store, outdoors, to parks.
  - In the car when traveling to and from testing or procedure.

You should wash your hands often and avoid touching your face.

FAQs: Drivers

Can my driver stay with me before my procedure?

If you are scheduled for procedures that require sedation, your driver should stay with you before your procedure. When you arrive, your driver will accompany you to the testing room and help you register for your appointment. You will be asked to remain in your car while waiting for your procedure. This is because you will be sedated, and there is a risk to the patient and staff if you are not awake. Your driver will meet you after your procedure and help you back to your car.

The driver will also be asked to remain in their vehicle while you are sedated. If you have any questions, please ask your driver.

You will be asked to remain in your car while waiting for your procedure. This is because you will be sedated, and there is a risk to the patient and staff if you are not awake.
If you are having a procedure which requires sedation, you must have a responsible adult companion to drive you to your appointment and help you check-in. Your driver will receive a paging device and be encouraged to practice social distancing by visiting the cafeteria, going for a walk, or waiting in their car while your procedure is performed instead of waiting in the waiting room.

Drivers will not be allowed to accompany you to the pre-op area.

Where should my driver go during the procedure?

Your driver must follow the same rules for all persons in the building. The rules include wearing a mask and staying at least 6 feet from others. Staying this distance from others may mean there is not enough room in the waiting area for drivers. Your driver may want to walk the halls, visit the cafeteria, or wait in their car. They should keep the pager they received at check-in with them at all times.

Can my driver be with me after my procedure?

Your driver will receive a notification when it is time for your discharge and they will join you then. Your healthcare team wants to give you your discharge instructions and make sure you understand them. Some patients are more awake than others after a procedure. If your care team has any concern that
What if my procedure is delayed, or takes longer than expected?

At Michigan Medicine our first priority is patient safety. There may be delays if we will need to spend extra time with a patient or a procedure is taking longer than planned. Patient safety includes a clean, sanitized space for patient care, which can also cause delays. We appreciate your patience and understanding. If you have questions about a delay, please visit the check-in desk for an update.

Will the cleaning process kill the COVID-19 virus?

Yes. The process for cleaning and sanitizing all equipment used in the procedures areas kills the COVID-19 virus.

Will I be protected from catching COVID-19 from the staff caring for me?

Yes. Your safety is important to us. The personal protective gear (PPE), such as gowns, gloves, and masks, that the staff wear will protect you from catching
COVID-19.
