Planning for the Procedure

You must have a driver who is 18 years or older present at check in and discharge. If you do not have a driver with you at check in, we will need to reschedule your appointment. This person must remain in the unit during your entire visit so that they are available as soon as you are ready to be discharged. You will not be discharged unless this person is in the unit. Because your judgment may be impaired after this procedure, you will not be released to take public transportation, a taxicab, or even walk home without another responsible adult present to accompany you.

The entire procedure appointment may take at least 3 to 4 hours to complete. Please advise your driver that they will need to remain in the facility for the duration of the procedure.

If you have diabetes, ask your health care provider for diet and medication instructions.

If you must cancel or reschedule your appointment, please call the Endoscopy call center as soon as possible at 734-936-9250 or toll-free 877-758-2626.

Following are your instructions for taking medicines and preparing for your procedure. Follow the instructions carefully to ensure a successful exam.

7 days before your upper endoscopy:

If you take aspirin or NSAIDS such as Advil®, Motrin, Celebrex®, or ibuprofen, you may continue to take them as usual.

NSAIDs: Aspirin, ibuprofen (Advil®), Motrin®, Celebrex®, or celecoxib.
If you take a blood thinner like Plavix®, Pradaxa®, Clopidogrel®, Coumadin®, warfarin, Effient®, Prasugrel®, or Lovenox®, ask your health care provider for specific instructions.

### 1 day before your upper endoscopy:

You may have your normal diet the day before the procedure.

### Day of your upper endoscopy:

Stop eating all solid foods 8 hours before your procedure. Clear liquids are acceptable to drink.
