

# Walking Exercises

## Walk, Slow Speed

### Suggested Accessories

→ Metronome **OR** clock with a second hand

### Safety

→ Perform this exercise on safe walkway. This should be a firm surface like tiled, linoleum, or wood floor, close to a wall or counter for your safety. Remove all rugs and obstacles from your walking path.

### Exercise Instructions

→ Walk 10 to 12 feet at a **slow speed** to the beat of a metronome set at 30 beats/minute. Try to take normal size steps.

→ Stand tall while walking, keeping your head up and looking straight ahead.

→ At the end of your walkway slowly turn around and return to your starting point.

→ Perform this exercise \_\_\_\_ times per day \_\_\_\_ times per week.

→ For added challenge perform this exercise while also naming countries from A to Z.

Disclaimer: This document contains instructions for occupational and/or physical therapy exercises developed by the University of Michigan Health System (UMHS). Your health care provider has determined that these exercises are beneficial to you based on your condition at this time. Talk to your health care provider if you have any questions about this document, your condition or your treatment plan, including whether it is appropriate to continue doing these exercises should your condition change.
