

Involuntary Discharge

You may be involuntarily discharged from the Pediatric Dialysis Unit for the following reasons:

- Failure to pay for services
- The facility stops operating.
- The facility can no longer meet your documented medical needs.
- We have assessed your case and determined that your behavior is disruptive and abusive to the extent that the delivery of your care, or the ability of the facility to operate effectively, is seriously impaired.

Unless there is an immediate threat to safety, the patient/family and renal network will be given 30 days' notice before involuntary discharge. The Pediatric Dialysis Unit will also attempt to contact other facilities and place the patient in another dialysis facility.
