

Stroke: Who is on Your Care Team

Our stroke team is dedicated to providing you with the best personalized care. The team includes staff with many different skills who work together to help you. Below is a list of the members of your care team. Feel free to ask any questions to anyone on the team.

Type of Specialist	Goal of Therapy
Attending Physician	A doctor who leads the stroke team. They decide on
	testing, treatment, and how you can prevent future
	strokes.
Cardiologists	Doctors who specialize in taking care of the heart. They
	determine if you have any heart problems that may have
	caused your stroke.
Care Managers	Registered Nurses who partner with you, your family, and
	the medical team to improve the coordination of care
	during your hospitalization and ensure a safe discharge.
Clinical	A specialist who provides continuing and comprehensive
Psychologist	emotional and behavioral healthcare for individuals and
	families.
Consulting	Doctors who specialize in an area related to your medical
Physicians	condition and advise on your care.
Dieticians	Provides you with a diet plan to fit your needs.
Neuro-Intensivist	A doctor who specializes in Intensive Care Unit (ICU)
	procedures and has skills in reviving the brain.
Neuro-	Uses imagery to guide gaining access to vessels and
Interventional	organs or organ structures.

	scanning devices for the diagnosis and treatment of
	diseases of the nervous system.
Neurosurgeon	A doctor who specializes in the diagnosis and surgical
	treatment of the nervous system and brain.
Nurses	Registered nurses assess, monitor and care for you during
	your hospital stay. They advocate for your care with all of
	the team members. The nurses will teach you how to care
	for yourself and how to prevent another stroke.
Nurse Practitioners	Nurses who are trained and qualified to examine,
(NP)	diagnose, and treat certain medical conditions. They
	discharge patients under the supervision of the physician.
Occupational	Therapists who provide a holistic approach (mind, body,
Therapists (OT)	spirit, and emotion) to help people reach the greatest level
	of function (activities of daily living) and independence to
	achieve the best result for health improvement during
	stroke recovery.
Physicians	Physician Assistants practice medicine on teams
Assistants (PA)	with physicians, surgeons, and other healthcare workers.
	They examine, diagnose, treat certain medical conditions
	and discharge patients under the supervision of the
	physician.
	Doctors dedicated to enhancing and restoring functional
Physical Medicine and Rehabilitation (PM&R)	ability and the quality of life to those with physical
	impairments or disabilities after a stroke.

Physical Therapists	Therapists who are trained in all aspects of anatomy and
(PT)	physiology related to normal function, with an emphasis
	on movement. They help stroke survivors to regain
	strength, coordination, balance, and control of movement
	including walking, climbing stairs, getting into and out of
	bed.
Rehabilitation	Creationing aligned reached any that for one are the
Psychologists	Specialists in clinical psychology that focus on the
	application of psychological principles for persons who
	have an injury or illness. They assess and treat cognitive,
	emotional, and functional difficulties, and help people to
	overcome barriers to participation in life activities.
Resident Physicians	Doctors who practice medicine under the direct or indirect
	supervision of an attending physician. They often help
	with monitoring and communicating with the attending
	physician and other disciplines.
