Laparoscopic Abdominal Surgery

Are there any diet restrictions?
- Return to your same diet as before surgery
- Taking smaller portions, more frequently during the day may help in transitioning to your regular diet (6-8 small meals per day)
- Avoid constipation; drink plenty of water and caffeine-free fluids. Take stool softener while you are taking prescribed pain medication

When can I go back to normal activities?
- No lifting anything greater than 5 – 10 pounds for 6 weeks. This includes strenuous activities such as vacuuming, lifting children, groceries, laundry, moving furniture, mowing lawns, sports activities.
- No driving until your first post-op visit. You may ride as a passenger.
- You may climb stairs in moderation.
- Walk as much as tolerated. This is the only activity/exercise allowed for 6 weeks.
- Resume sexual activity as discussed at your first post-op visit.

How will I care for my incision?
- You may shower your incisions once home. Gently wash incisions and pat dry. Leave open to the air and dry; no use of powders or creams. No tub baths, hot tubs, or swimming until the incisions are completely healed
- Avoid tight clothing around your incision sites or fabrics which may irritate the skin. Wear loose comfortable clothing
- If steri strips are present, these will fall off in about 1-2 weeks. Do not pull them off earlier.
How I manage my pain at home?

- For best pain control take your pain medication at regular intervals, about every 4-6 hrs. This will prevent pain build-up that may occur. Use only as much prescription pain medications as you need.
- Taking over the counter ibuprofen (Motrin®, Advil®) alternated with prescription pain medication may improve pain control
- Do not drink alcohol or drive while taking narcotic pain medication

When should I call my doctor?

Call if you have any of the signs and symptoms that may indicate an infection:

- Temperature above 101°F
- Significant increase in wound pain or discomfort
- Excessive redness, swelling, or drainage from the incision sites. It is normal to have scrotal swelling and bruising
- The incisions begin to open

Call if you have any changes in your overall health such as having:

- Nausea
- Vomiting
- Chills
- profuse (excessive) sweating
- diarrhea
- constipation
- inability to urinate or completely empty bladder

What is the number to call?

- On weekdays contact the General Surgery Call Center at 734- (734)-936-5738 (Monday – Friday, 8am –5 PM)
- On weekends, holidays, or after business hours call 734-936-6267 (hospital paging) and ask for the surgery resident on-call.

What is my follow-up care?
• You will return to the clinic for your follow-up visit about two weeks after discharge. If you have not already received an appointment, we will arrange it and notify you via the patient portal or by mail.
