Neck Lift
Post-Operative Instructions

What are my post-operative instructions?

- Have someone drive you home after surgery and help you at home for 1-2 days.
- Get plenty of rest and follow balanced diet.
- Decreased activity may promote constipation, so you may want to add more raw fruit to your diet, and be sure to increase fluid intake.
- Take pain medication as prescribed. Do not take aspirin or any products containing aspirin unless approved by your surgeon.
- Do not drink alcohol when taking pain medications.
- Even when not taking pain medications, no alcohol for 3 weeks as it causes fluid retention.
- If you are taking vitamins with iron, resume these as tolerated.
- Do not smoke, as smoking delays healing and increases the risk of complications.

What should my activity level be?

- Start walking as soon as possible, as this helps to reduce swelling and lowers the chance of blood clots.
- Do not drive until you are no longer taking any pain medications (narcotics).
- Return to work in approximately 2 weeks.
- Avoid strenuous exercise and activities for 3-4 weeks.

How do I take care of my incision?

- If a drainage tube(s) has been placed, you may shower 48 hours after removal.
- Avoid exposing scars to sun for at least 12 months.
- Always use a strong sunblock, if sun exposure is unavoidable (SPF 30 or greater).
- Keep steri-strips on.
- Keep incisions clean and inspect daily for signs of infection.
- Hair can generally be shampooed in 2-3 days.
- Hair bleach and/or a permanent can be applied after complete healing, usually 3-4 weeks.
- When using a hair dryer, never use a “hot” temperature setting, as you may not have feeling in the operated area.

**What can I expect to feel?**
- Minimal postoperative pain.
- Temporary numbness.
- Swelling, discoloration, and tightness of skin for 10-14 days.

**What follow-up care will I receive?**
- Sutures are usually removed within 7 days.

**When should I call my doctor?**
- If you have increased swelling or bruising.
- If swelling and redness persist after a few days.
- If you have increased redness along the incision.
- If you have severe or increased pain not relieved by medication.
- If you have any side effects to medications; such as, rash, nausea, headache, vomiting.
- If you have an oral temperature over 100.4 degrees.
- If you have any yellowish or greenish drainage from the incisions or notice a foul odor.
- If you have bleeding from the incisions that is difficult to control with light pressure.
• If you have loss of feeling or motion.

Who should I call if I have questions?
• (734) 998-6022, Monday - Friday, 8 a.m. - 4:30 p.m.
• After hours and on weekends, call Hospital Paging at (734) 936-6267 and ask for the Plastic Surgeon on call.
