Internally Draining Percutaneous Transhepatic Catheter (PTC) - Attaching a Drain Bag

1. Prepare drainage bag and connecting tubing
2. Insert drainage bag white adaptor into corrugated tubing

3. Close clamp on bottom of bag
4. Connect connector tubing to white adaptor

5. Connecting PTC tube to drainage bag

Remove white cap on end of PTC tube and discard
6. Remove (and discard) white cap before connecting drainage bag

7. Connect tubing to PTC tube
8. Ensure “stopcock” is open to drainage
