Peers: Provide Feedback Within 7 Days of RN Request

Peers, please complete the peer feedback process within 7 days of receiving an email request via our Peer Selection and Invitation Tool. The email, sent pre-filled by the RN via Qualtrics, contains a personalized link and the domains you’re requested to evaluate. It also has “sneak peek” links to the domain questions (see maize box).

Average completion time: 10-15 minutes
Survey response format:
- clickable questions
- short paragraph for your domain(s)
- short paragraph summary

NOTE: The peer feedback survey tool must be completed in one sitting. You cannot leave the program and return later to complete.

Follow the instructions as prompted within the peer feedback tool, being sure to evaluate ALL domains or areas requested by the RN. When you submit the survey, a copy of your responses will be auto-forwarded via email to:
- you
- the RN who requested the feedback
- the clinical nursing director/supervisor

Visit our Performance Evaluations website for more information.
