Current Metrics

Active Metrics

- Inappropriate Abx Duration for SSTI – Adult
- Inappropriate Abx Duration for SSTI – Peds
- Inappropriate Abx Selection for SSTI – Adult
- Inappropriate Abx Selection for SSTI – Peds
- Inappropriate FQ Use for UTI

General Tips

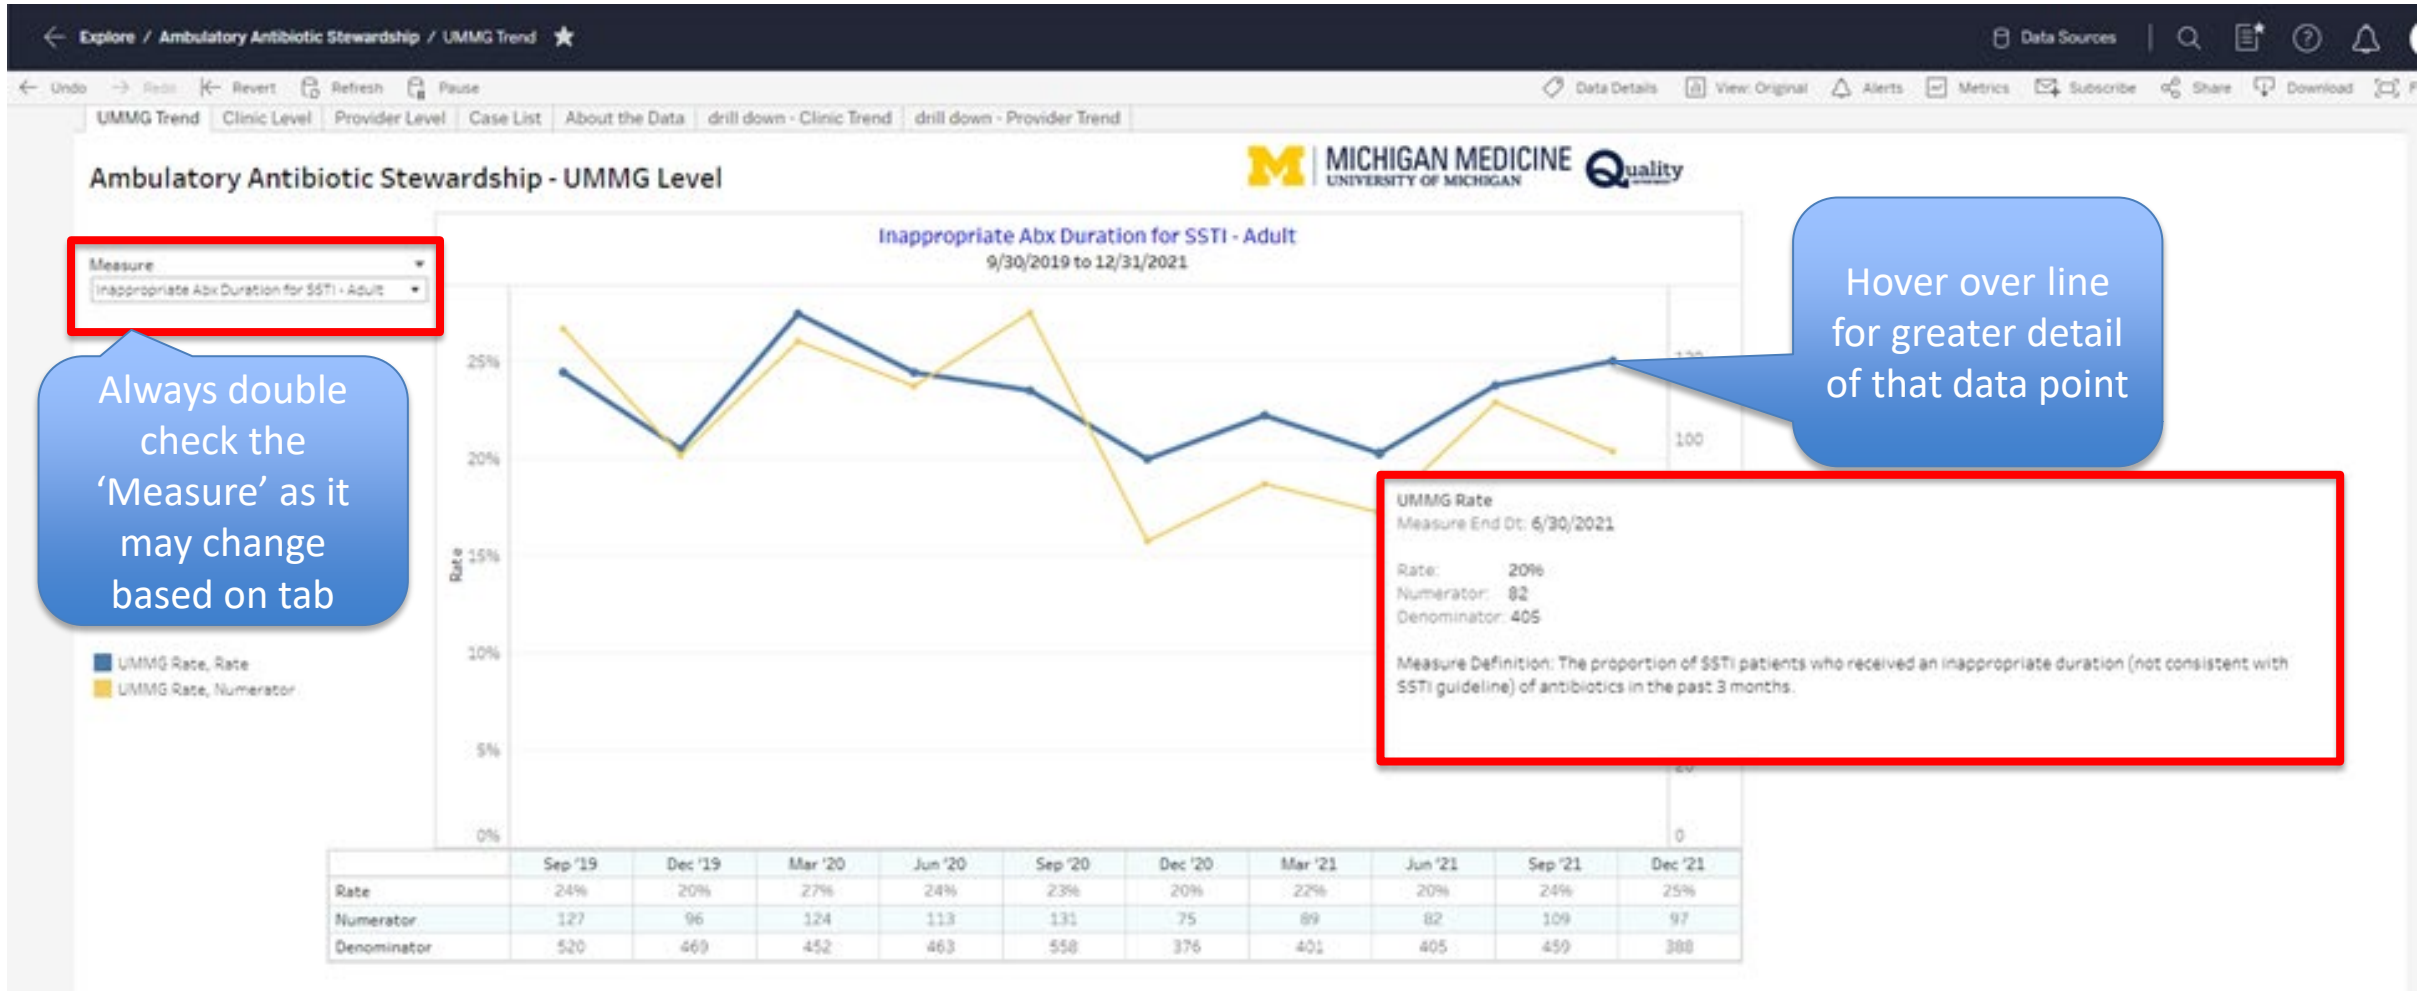

General Tips

- Always check the **‘Measures’ tab** to ensure you are looking at the correct measure
 - Sometimes these default to a different value when changing views
- Some filters require **‘Apply’** to enable the filter
- If your name does not populate, try broadening the filters
 - Adjusting the date range can fix this 50% of the time (in case you did not see any patients in that category during that timeframe)

UMMG Trend

Overall progress for a given metric

UMMG Trend

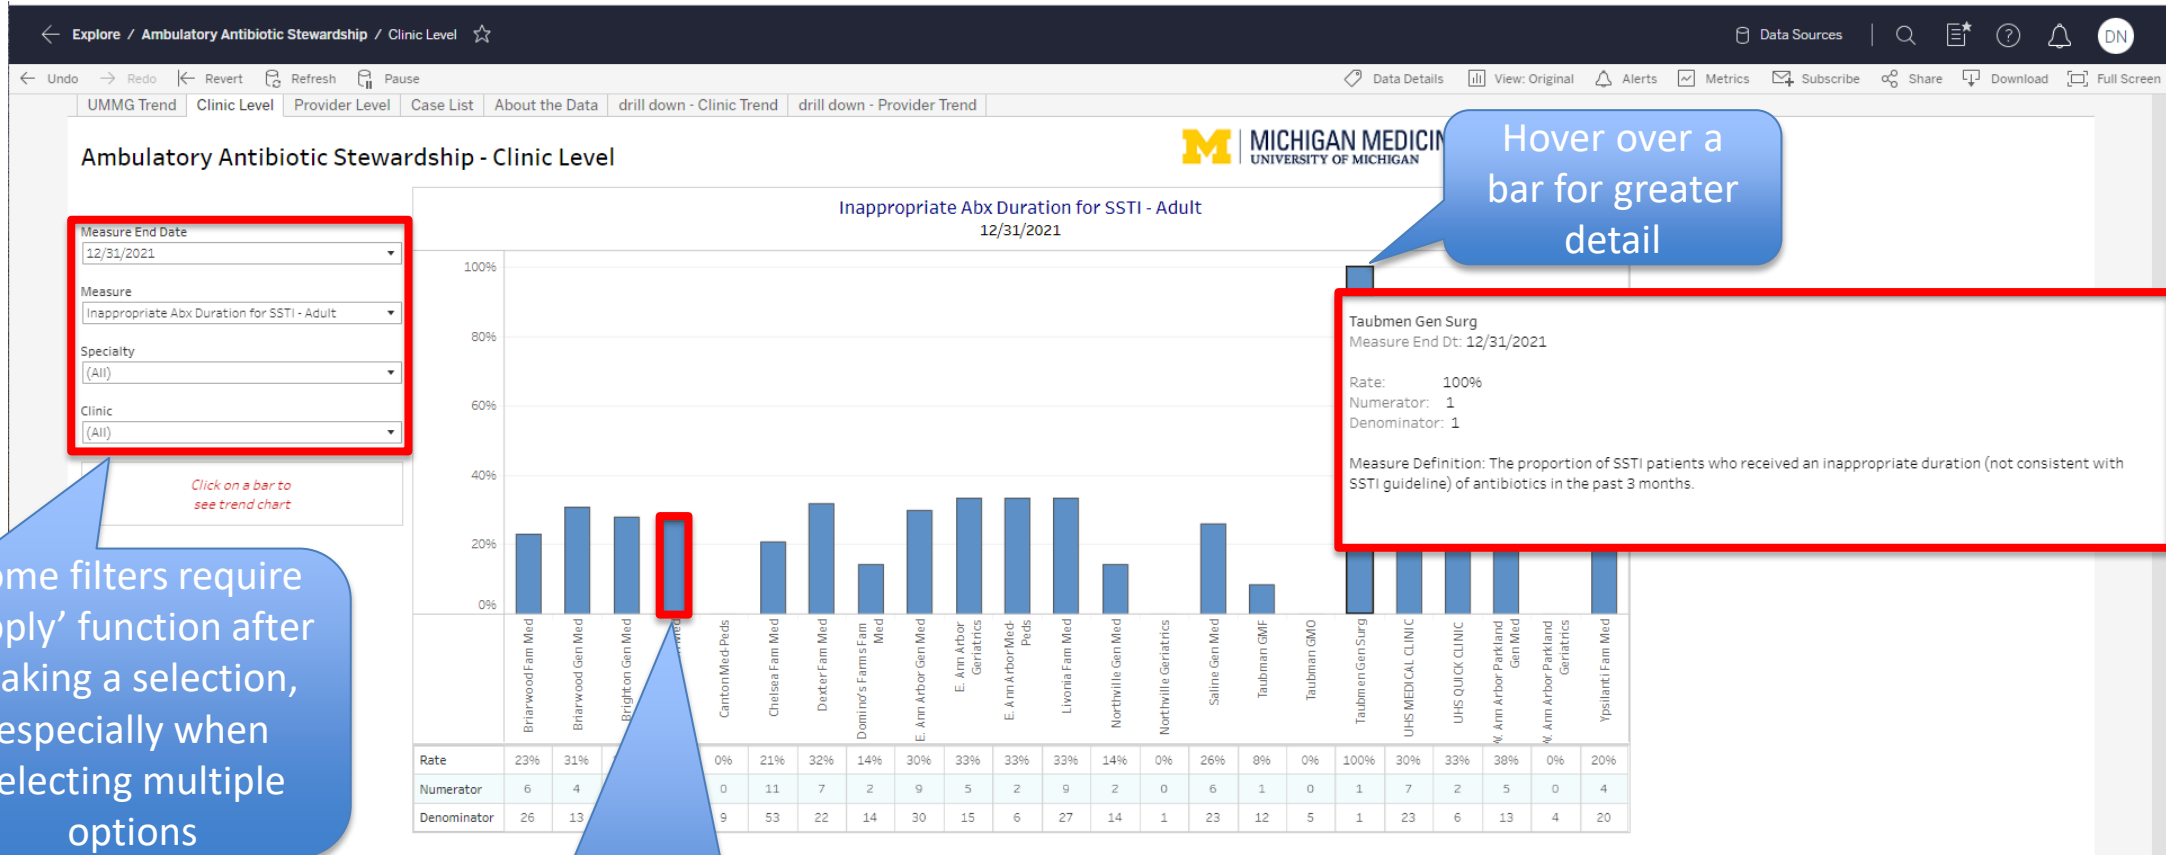

Always double check the 'Measure' as it may change based on tab

Hover over line for greater detail of that data point

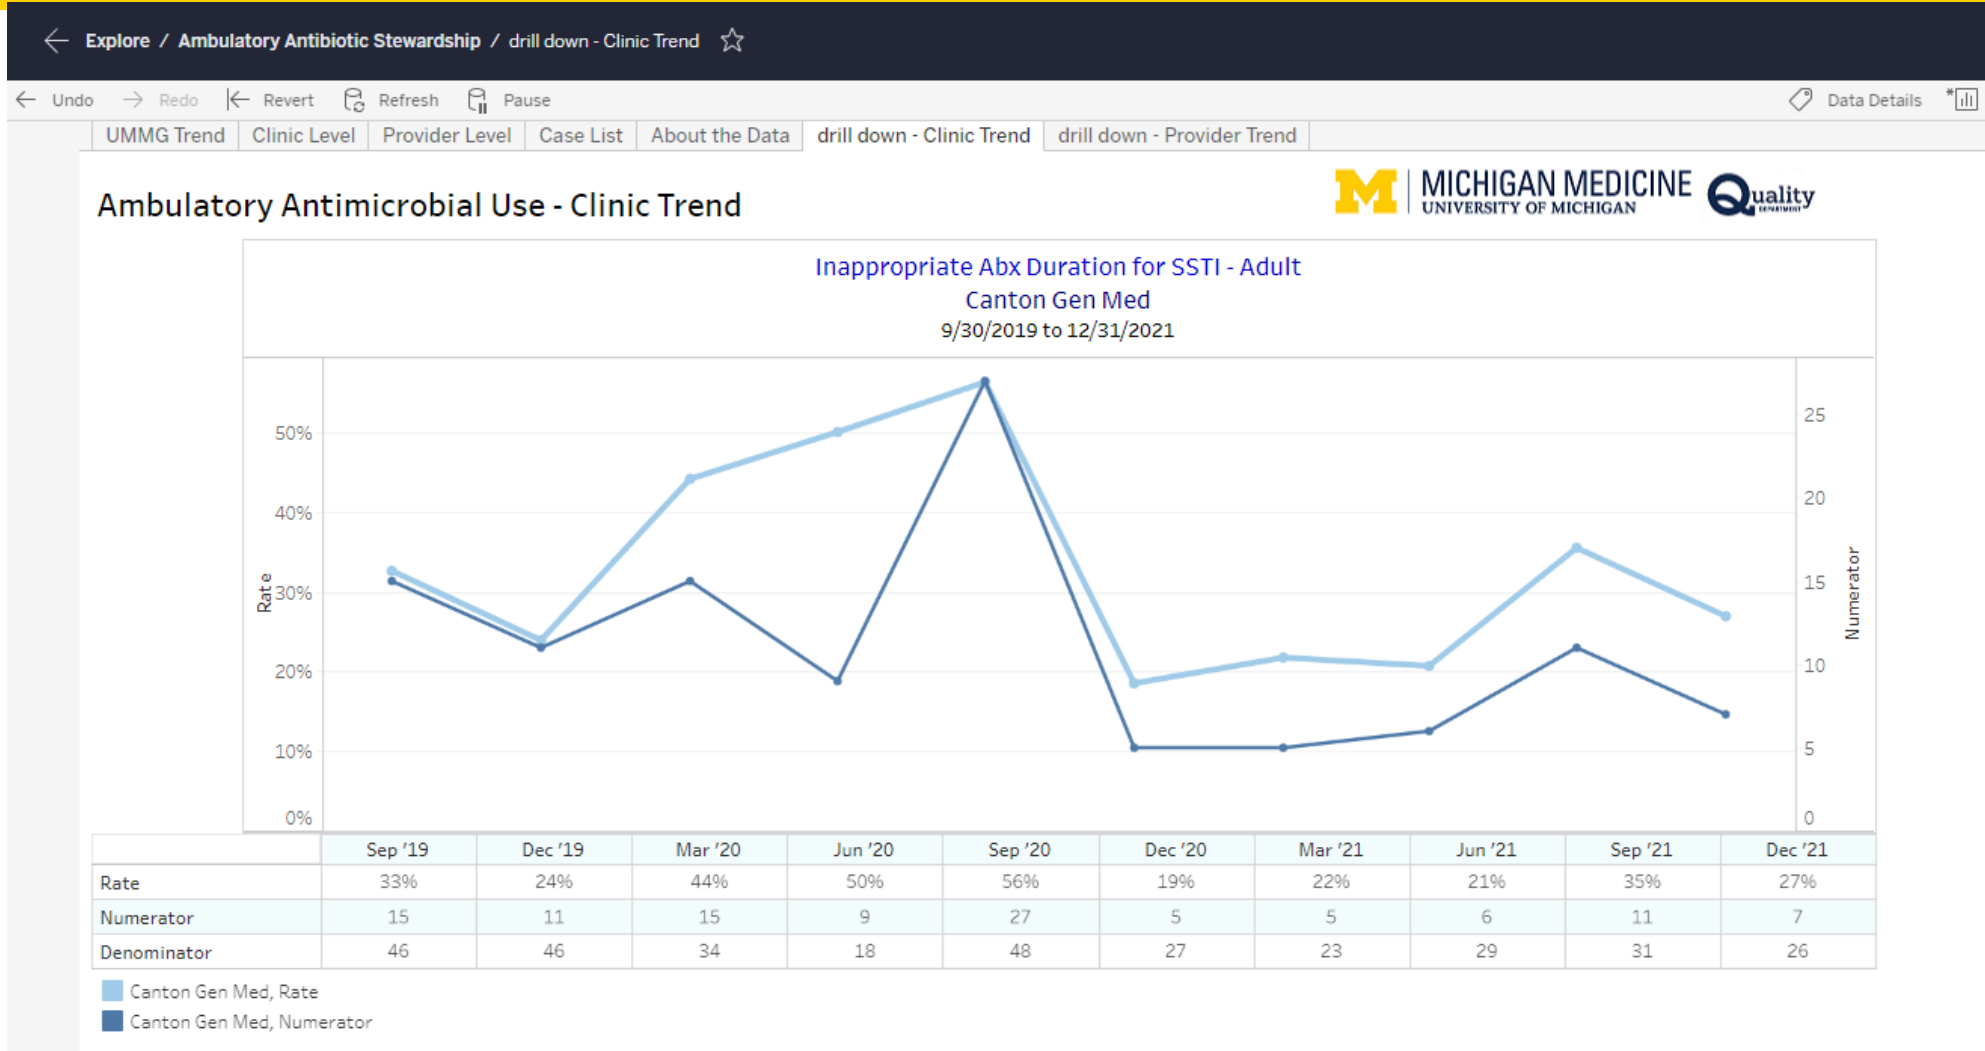

Clinic Level

Progress for a specific clinic or specialty

Clinic Trend

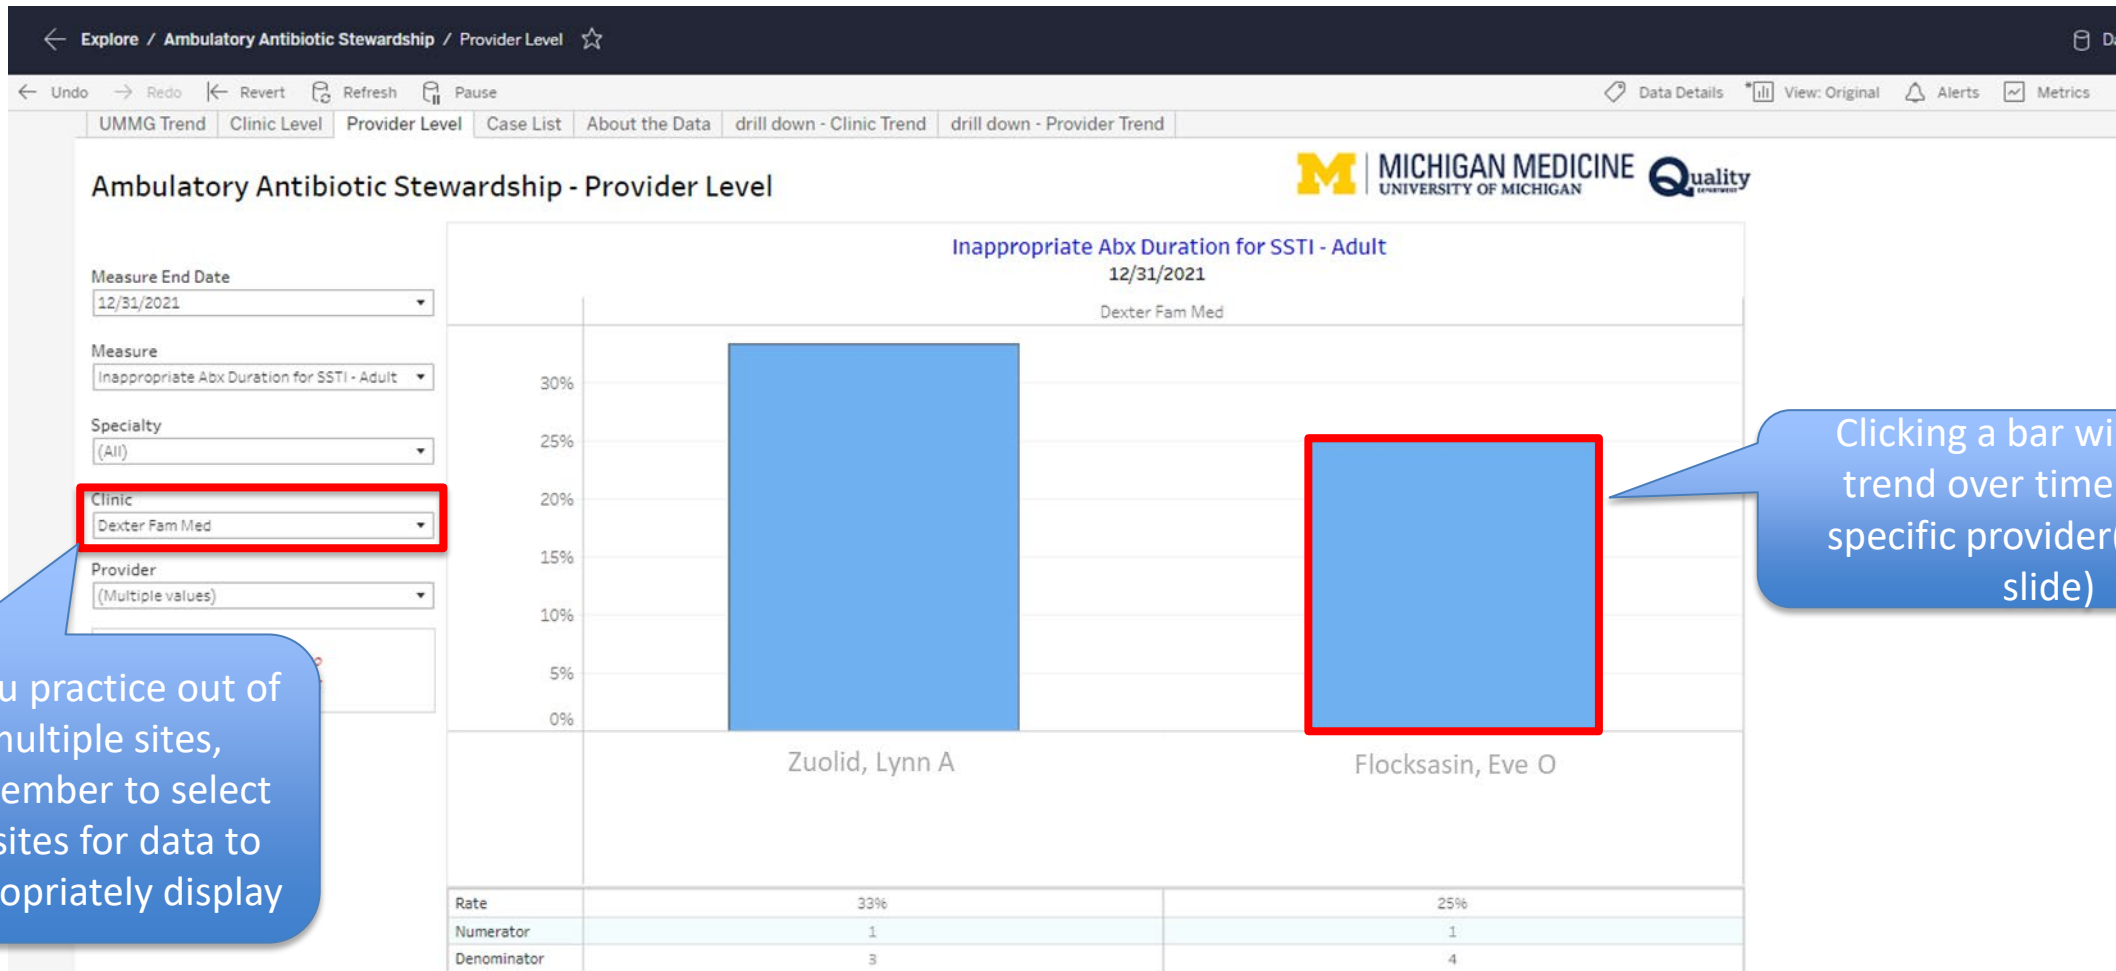

Clinic Trend

Provider Level

Progress for a specific provider

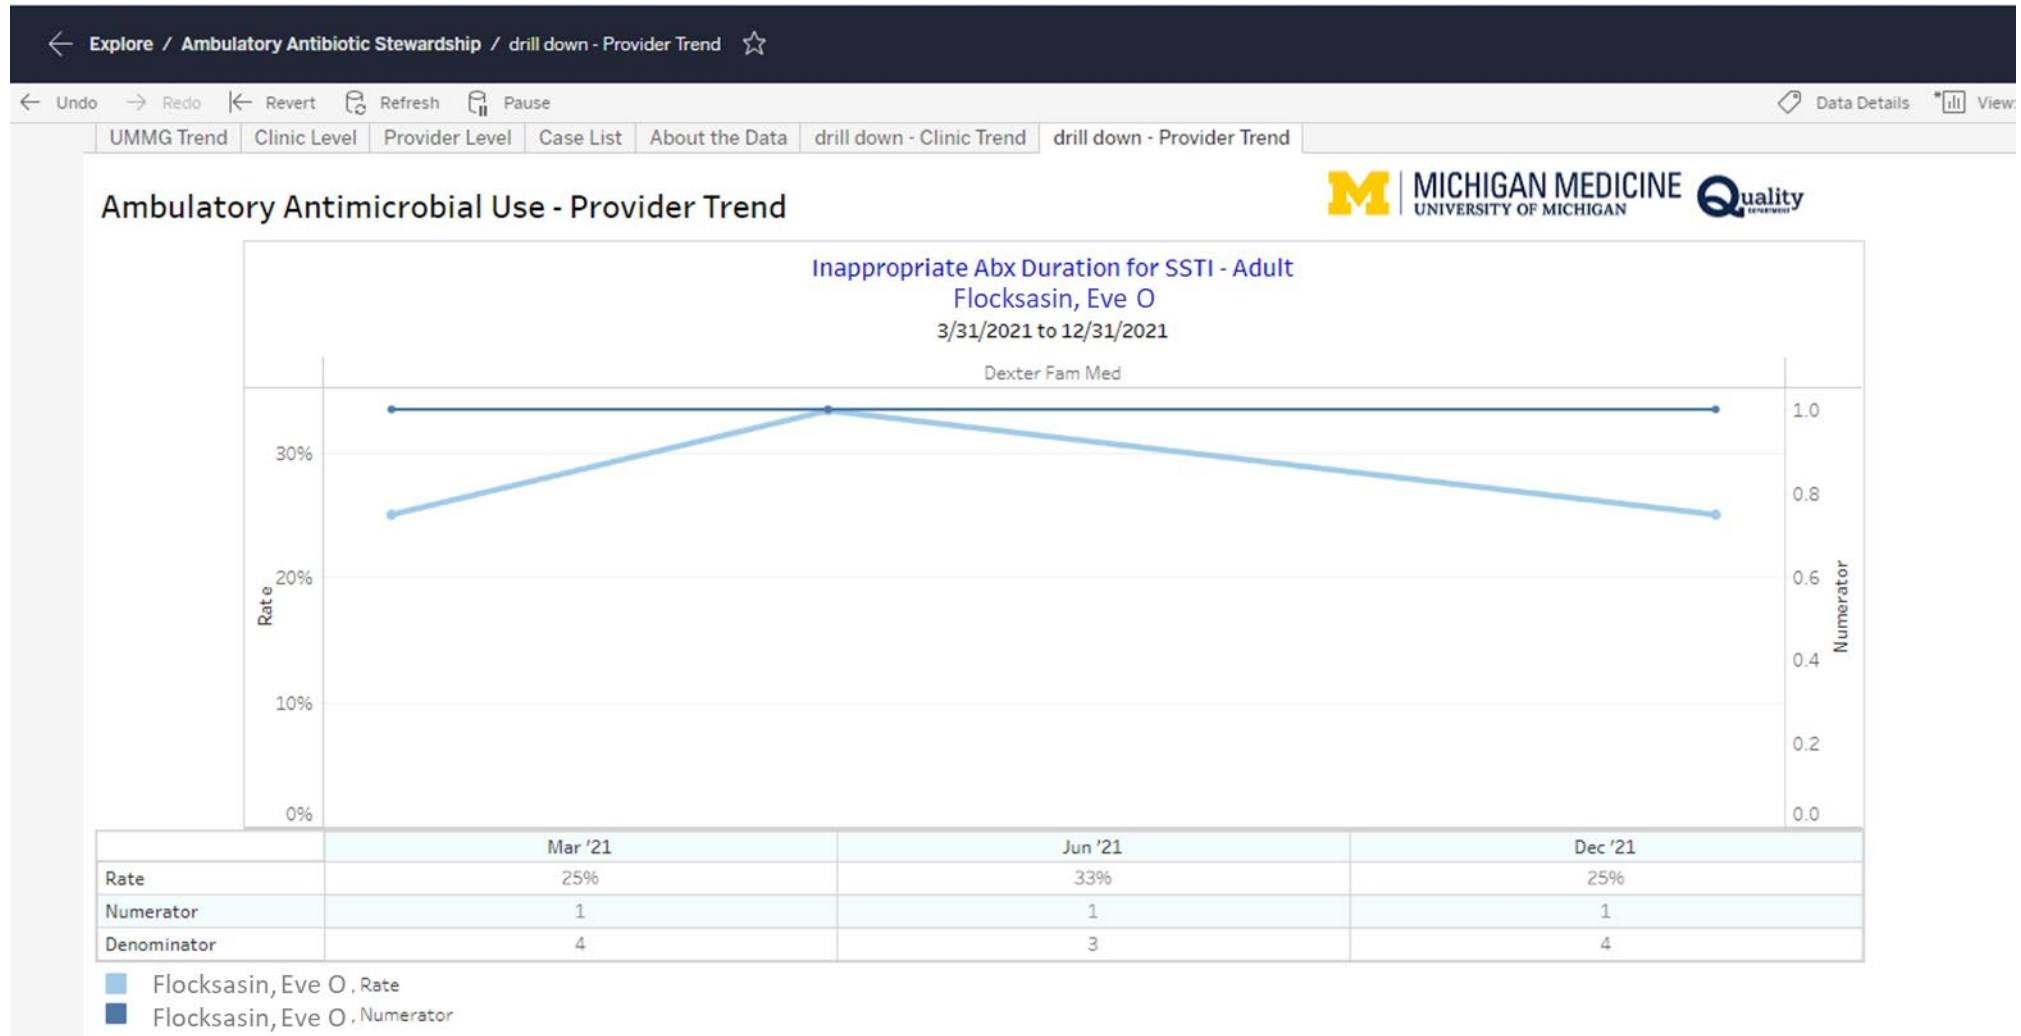

Provider Level

If you practice out of multiple sites, remember to select all sites for data to appropriately display

Clicking a bar will open a trend over time for that specific provider(see next slide)

Provider Level

Case List
