Join us at this community symposium to hear from Photojournalist, Peter Menzel, Co-author of "Hungry Planet, What The World Eats," and Kim Eagle, MD, Director of Project Healthy Schools, to explore cultural/geographical relationships to food and the need for nutrition as a prevention to chronic disease.

SPEAKERS:

Peter Menzel, co-author of the book entitled "Hungry Planet: What the World Eats." The book explores how globalization, migration, and rising affluence are affecting the diets of communities around the globe.

Following Peter's talk, **Dr. Kim Eagle**, Albion Walter Hewlett Professor of Internal Medicine and Director of the Cardiovascular Center at the University of Michigan Health System, will provide an overview of Project Healthy Schools, a program designed to teach middle school students about heart-healthy lifestyles, including the need for nutrition, with hopes of reducing their future risk of cardiovascular disease and diabetes.

M|ICHR

Michigan Institute for Clinical & Health Research

Brought to you by the Ann Arbor District Library and the Michigan Institute for Clinical & Health Research with funding from the National Institutes of Health.
