

Register for the Inaugural Immuno-Hematology Symposium

Keynote Speaker

Dr. Steven M. Holland

*Chief, Laboratory of Clinical Infectious Diseases and
Immunopathogenesis Section at the NIAID*

All staff and students are invited to join us for this day-long event featuring clinical and bench scientist presentations on disorders of the immunologic and hematologic systems.

Objective: Participants will be able to better identify, diagnose and provide resources to patients with immuno-hematologic disorders.

A maximum of 5.25 AMA Category 1 CME Credits will be awarded to participants

Date: Friday February 28, 2014; 9:30am-4:30pm. **Lunch and symposium binder will be provided to registered participants.**

Location: Kahn Auditorium, Biomedical Science Research Building

9:30am	Introduction	<u>Lymphoproliferation</u>	
	<u>Neutropenia</u>	1:00pm	Recurrent Fevers and Self-Resolving Cytopenias in an Infant with XIAP Deficiency - <i>Dr. Miriam Bornhorst</i>
9:45am	Patient Presentation: Living with Neutropenia - <i>Dr. Kristin Hayes</i>	1:15pm	Regulation of HIF-1alpha by XIAP-Mediated Ubiquitination - <i>Dr. Niall Kenneth</i>
10:00am	Evaluation of the Safety and Efficacy of G-CSF During Pregnancy in Women with Severe Congenital Neutropenia - <i>Dr. Laurence Boxer</i>	1:30pm	Can We Translate Our Knowledge of the Cellular Roles of SAP and XIAP into New Treatment Modalities for XLP Disease? - <i>Dr. Colin Duckett</i>
10:30am	BREAK		
	<u>Bone Marrow Failure and Transplantation</u>	<u>Primary Immune Deficiency</u>	
10:45am	From Oman to Ann Arbor; Dyskeratosis Congenita in the Modern Era of Therapy - <i>Dr. James Connelly</i>	2:00pm	Patient Presentation: Impact of an Abnormal Newborn TREC Assay - <i>Ashley Shaver, MD Candidate</i>
11:00am	Telomerase and Shelterin Defects in Bone Marrow Failure Syndromes - <i>Dr. Ivan Maillard</i>	2:15pm	Functional Characterization of a Hypomorphic Artemis Mutation Associated with Immunodeficiency and Lymphoma - <i>Dr. JoAnn Sekiguchi</i>
11:30am	Delta-Like Notch Ligands Expressed by Host Non-Hematopoietic Radioresistant Cells Regulate Graft-Versus-Host Disease - <i>Dr. Christen Ebens</i>	2.45pm	BREAK
11:45am	Fatty Acid Metabolism Provides a Potential Therapeutic Target to Treat Graft-Versus- Disease - <i>Dr. Craig Byersdorfer</i>	3:00pm	Glioma-Derived Galectin-1 is a Potent Suppressor of NK Immunosurveillance - <i>Gregory Baker, PhD Candidate</i>
		3:15pm	Introduction of Keynote Speaker
		3:30pm	Leukocytes, Leukemia and Lymphatics: This has GATA2 be Good - <i>Dr. Steven Holland</i>
12:00pm	Lunch and Poster Session
