15100-H: SUPPLEMENTAL VALVES GUIDELINE FOR UMHHC FACILITIES

Related Sections
Basis Guideline: 15100 - “Valves”
For an explanation of the use of these guidelines, see SID-A-H “Design Guidelines for UMHHC Facilities”

General
Specify only serviceable valves, non-serviceable valves are not allowed.
Valves for deionized, reverse osmosis and/or distilled water lines shall be of the same material as the service line; i.e., polypropylene.

Design and Application Requirements
Potable Water Systems and Hydronic Systems
Isolation valves 2” & smaller shall be full-port, quarter turn ball valves with a stainless steel ball. Isolation valves 2-1/2” and larger shall be high performance butterfly valves.
