8.2: UMHHC - ARCHITECTURAL PML

This list is a compilation of products approved for use on University of Michigan Hospitals and Health Centers projects. Where specific manufacturers or products are listed for a given building element; limit selection to the products listed. When, in the consultant’s opinion an unlisted product should be considered for inclusion in a project, consult with the UMHHC Design Manager. Do not substitute this list for professional judgment concerning appropriate products or materials.

Where specific products are not listed for a given building element, base the selection of manufacturers, types, styles or models on professional judgment. Wherever possible, select the products of at least 3 manufacturers. Do not use open ended "or equal" statements.

The latest version of this list will be posted on the UMHHC Facilities Planning and Development website.

For Design Guideline sections not listed herein, refer to the University of Michigan Architectural, Engineering and Construction Preferred Manufacturers List, available at http://umaec.umich.edu/desguide/pml/A_PML.pdf. This hospital PML supersedes the AEC PML where there is duplication or conflict.
