

8.6: UMHHC - INTERIOR DESIGN PML

This list is a compilation of products approved for use on University of Michigan Hospitals and Health Centers projects. Where specific manufacturers or products are listed for a given building element; limit selection to the products listed. When, in the consultant's opinion an unlisted product should be considered for inclusion in a project, consult with the UMHHC Design Manager. Do not substitute this list for professional judgment concerning appropriate products or materials.

Where specific products are not listed for a given building element, base the selection of manufacturers, types, styles or models on professional judgment. Wherever possible, select the products of at least 3 manufacturers. Do not use open ended "or equal" statements.

The latest version of this list will be posted on the UMHHC Facilities Planning and Development website.

Accent Colors: Contact Interior Design

Notes for Paint:

Accents Colors: To be used on **one office wall only**. Select the building indicated neutral to go on the remainder of the walls. Paint should be an eggshell finish, except for door frames and patient rooms which should be a semi-gloss finish. For questions please contact Anne Parker, Manager, FPD Interior Design at (734) 763-6452.

General Note: Public Space accents must be designated and approved by Facilities Planning and Development Interior Design. Public Spaces include corridors, exam, waiting and patient rooms.
