VALET AND HANDICAP PARKING ARE AVAILABLE

An attendant is available to assist patient while a family member parks the car.
We help adults of all ages with chronic conditions or life-limiting illnesses to stay independent and symptom-free for as long as possible. The Palliative and Supportive Care Clinic is able to provide many services:

• Educating patients and families about palliative care
• Educating patients and families about their disease and what to expect
• Educating patients and families about treatment of symptoms
• Treatment of pain and other distressing symptoms such as anxiety and depression
• Ongoing support and coordination of care with the primary physician
• Discussion of patient wishes and overall goals of care and development of treatment plans

• Help with difficult decisions often encountered:
  • Assigning a durable power of attorney for healthcare
  • Living wills and other advanced directives
  • Decisions about “DNR” or resuscitation
  • Decisions about feeding tubes and artificial nutrition and hydration
  • Decisions about hospice care

• Work with hospice programs, if appropriate, to coordinate care and address questions about the dying process
• Assistance with accessing Medicare, Medicaid and other benefits
• Support for family members experiencing caregiver stress, grief and bereavement
