U-M Team Walks to End Alzheimer’s

This past Sunday, October 6th, 2013, hundreds of walkers of all ages participated in the Alzheimer’s Association’s annual Walk to End Alzheimer’s – despite the overcast, drizzly weather – including a team of faculty, staff, and family from the U-M Geriatrics Center, Michigan Alzheimer’s Disease Center, and Program for Positive Aging. The walk took place at Gallup Park in Ann Arbor. Congratulations to the U-M team, whose combined donations and efforts raised over $8,000 – all supporting research into prevention, treatment, and a cure for Alzheimer’s, as well as programs to help the millions already affected. Many thanks!
