Your Child’s Michigan Medical Home

A Medical Home is a primary care clinic where a team of health care professionals led by a doctor work together to provide your child with family-centered, coordinated medical care. Through office visits, telephone visits and communicating over the secure patient portal, your medical home provides your child and you with a place to contact for all their medical needs. Your child’s doctor is your care-partner in managing your child’s medical conditions and setting goals for keeping your child healthy and active. It is a place that takes care of most of the medical needs of your child.

Being part of the Michigan Medical Home means you can trust us to:

- Provide preventive services, take care of short term illnesses and long term chronic diseases
- Discuss your child’s goals and how you and your child would like to improve your child’s health
- Listen to you and your child and address your child’s concerns
- Provide you with information about your child’s health in a way you can understand
- Respond promptly to your calls, questions and concerns
- Have a doctor on call after hours for urgent calls
- Remind you when vaccines and tests are due
- Notify you of your child’s test results in a timely manner
- Help coordinate your child’s care with specialty doctors if necessary

Having a Medical Home means we trust you to:
