### Clerkship Objectives

#### To enhance knowledge and skills pertaining to

Interviewing, physical examination and other patient interactions.  
Interpretation of data.  
Clinical judgment.  
Procedures:  
Head and neck surgical procedures.  
Audiology.  
Vestibular Testing.  
Therapy and advice to patients.

#### To increase student involvement in conferences, etc. by having students

Present patients and/or patient data.  
Participate as a member of the audience.

#### To increase student use/review of the medical literature

As part of patient care (report to attending).

#### How students will be evaluated

Quality of care given (including clinical judgment).  
Participation and performance in conferences.  
Level of knowledge (especially new knowledge).  
Level of skills.

#### Methods to Evaluate Student Performance

Observation of performance by faculty.  
Observation of performance by house officers.  
Assessment of write-ups/reports.  
Oral examination (Oral exam is mandatory, but performance will only factor into student's grade if results will raise final grade).

#### Course Description:

A comprehensive clinical experience with exposure to diagnosis and management of a spectrum of problems (from simple to complex) in the field of Otolaryngology - Head and Neck Surgery. Medical students will participate in outpatient clinics, inpatient rounds and operative procedures. Students will be expected to adequately prepare for these activities through the appropriate use of medical literature and other learning experiences. The overall goals of the elective will be tailored to each student's career choice; this would be a very useful experience, for example, for any student interested in entering a Primary Care field or in a Specialty Area involving the Head and Neck.
