#### Course Description:

Students will be involved in admissions to the Diagnostic and Research unit of the Child Psychiatry Service, attending to patient care, management and treatment planning. Students will also be involved in child consultation service, looking at psychiatric/psychological issues of children with illness working with children and their families and with the pediatric teams. By individual arrangement this rotation can provide the opportunity for doing supervised outpatient evaluations. Elective should be considered by students thinking of pediatrics and family practice as well as psychiatry.
