

UNIVERSITY OF MICHIGAN MEDICAL SCHOOL
Department of Psychiatry
Office of Student Education, Beth Weihe, 936-5891

**Guidelines for Senior Year for Students Interested in
Pursuing a Career in Psychiatry**

Subinternship:

A general medicine subinternship at one of the core hospitals.

Intensive Care:

Coronary Care Unit or Critical Care Medicine

Electives:

Schedule only 1-2 electives in psychiatry at most, choosing electives different from one's clerkship experience and more to firm up the decision to pursue psychiatry as a career.

Choose electives in order to broaden one's general medical knowledge and experience, such as Outpatient Medicine, Geriatric Medicine, or Family Medicine. Other useful electives are Neurology's Special Elective or Clinical Clerkship, Neuroradiology and/or Endocrinology, or Pediatrics' Applying the Medical Humanities to Clinical Medicine.

Psychiatry Research (those interested in this elective should contact Dr. Chandra Sripada, sripada@umich.edu, to set up the elective before being registered).

Also consider electives in experiences that you expect to see less of as you pursue your formal training. If there are further questions about recommendations or specific courses in psychiatry, please call Dr. Tamara Gay, 936-5891 or email at tlgay@umich.edu

Interviewing:

Interview season goes from November through the first part of February
