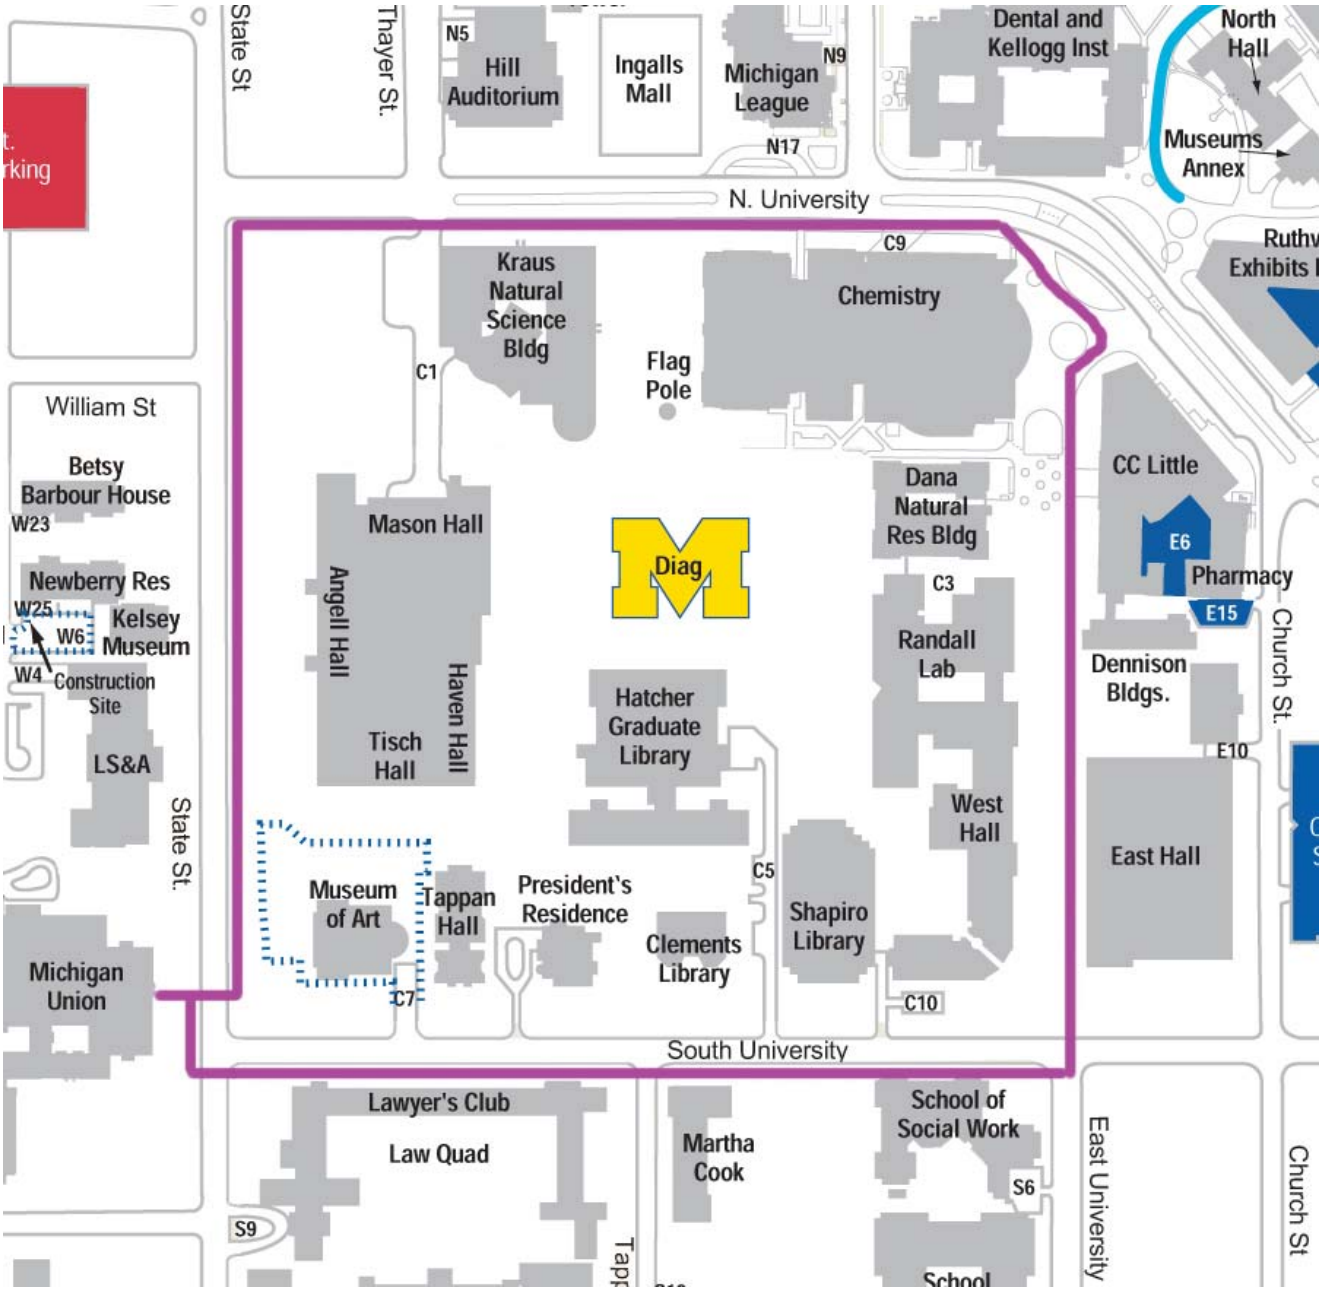
Central Campus 1-Mile Route



Absolutely accurate mile. These instructions are long and detailed but really it is the simplest of paths. Try it once and see. All you are doing is walking around the square staying to the *inside* on the west and north side streets, and on the *outside* on the east and south side streets. Starting at the entrance to the Michigan Union, you need to cross State Street and turn facing north on the east side. You should walk north along the east side of State Street, turn east and walk along the south side of North University, at the north east corner go around the odd shaped lawn on its north and east side, turning south down the east side of the “East University Pedestrian Mall”, cross South University, turn west and cross East University, walk along the south side of South University, crossing South University at State St. and so back to your starting point. Following this path the mile you walk will be as accurate as walking around a running track.
