

SAVE THE DATE - 10.29.2019

Collaborative Approach to Hypertrophic Cardiomyopathy (HCM)

Complimentary Dinner on Tuesday, October 29, 2019 at 6:30pm

Andiamo Livonia | 387037 7 Mile Road | Livonia, MI 48152

This program is part of a series of outreach meetings for Cardiologists, Cardiac Surgeons, Primary Care, Family Medicine, Sports Medicine physicians and their midlevel providers. You will hear an overview of Hypertrophic Cardiomyopathy (HCM), an update on medical management, as well as a discussion regarding personalized risk assessment, genetic diagnosis of HCM, and invasive septal reduction and mitral repair for HCM.

COURSE OBJECTIVES:

Upon completing this course, the participant will be able to:

- Be able to clinically stage hypertrophic cardiomyopathy and accurately predict intermediate and long-term risk of sudden death and progressive heart failure.
- Know the available and emerging medical treatment options for hypertrophic cardiomyopathy.
- Understand how genetic testing influences both prognosis and accuracy of family screening.
- Know when to refer for invasive septal reduction for hypertrophic cardiomyopathy.

PRESENTED BY:

Rajani Aatre, M.S., C.G.C.

Genetic Counselor

Adam Helms, M.D.

Assistant Professor of Internal Medicine

Francis Pagani, M.D., PhD.

Otto Gago, M.D. Endowed Professor of Cardiac Surgery

Sara Saberi, M.D.

Assistant Professor of Internal Medicine, Faculty Planner

We hope you will join us for this informative discussion. Please **RSVP by October 25, 2019** using the following link <http://michmed.org/HCMDinner> or via email to MichiganMedicineOutreach@med.umich.edu. Seating is limited, register today. We look forward to seeing you.
