

Advanced Rehabilitation Research Training Program Seminar/Journal Club 2011

Bruno Giordani, PhD
Associate Professor, Psychiatry and
Psychology Department, Director, Clinical
Core, Michigan Alzheimer's Disease
Research Center Section Director,
Neuropsychology Section

“Update on Alzheimer’s Disease and Other Dementias.”

9:00 am, Friday, July 29, 2011
2nd Floor Conference Room
325 E. Eisenhower, Building #1

Series Purpose:

This series is designed to assist Ph.D. and M.D. Fellows as well as P.M.&R. Residents and other trainees with advanced skills in rehabilitation research methodology. Issues to be covered include: most common research designs used in rehabilitation, how to critique and evaluate a published research article, how to write a successful research grant, ethical concerns in the conduct of research and state of the art information on research about specific topics of interest in rehabilitation. Participants in Seminar/Journal Club have no commercial relationship relevant to this presentation.
