

# Donning (Putting on) PPE

1. Gather Supplies (gown, gloves, N95, eye protection)

2. Perform hand hygiene

3. Don gown. Tie gown in back.

4. Don N95 respirator, ensuring a tight fit

5. Don eye protection

6. Don gloves

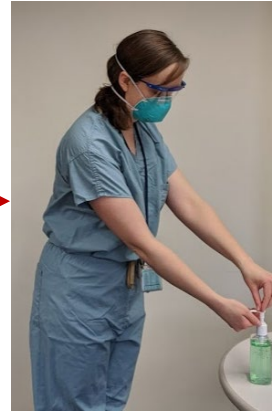

# Doffing (Taking Off) PPE

**\*\*Your PPE is considered contaminated. Care should be taken to avoid touching the outside\*\***

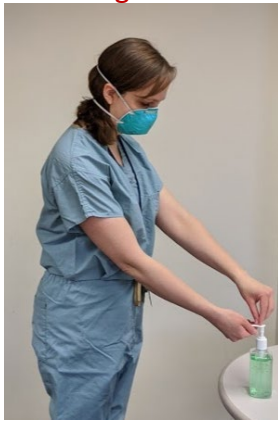

Leave  
the  
patient  
room

1. Within the patient room, take off gown and gloves together by pulling gown forward, roll gown, and remove gloves at the same time. **Do not touch the outside of the gown.**

2. Perform hand hygiene

3. In the anteroom (if available) or outside of the patient room, remove face shield by grabbing the sides, not the front

4. Perform hand hygiene

5. Remove N95 by grabbing the straps and pulling forward. **Do not touch the front.**

6. Perform hand hygiene
