New Features

- Unified Framework
- Column Types
- Interaction
- Selection steps
- Groups
- Calculated Items
- Unified Prompting
- New Graph Features
- Maps
- BI Publisher Integration and Web Editor
What Is the Home Page?

The Home page provides a starting point for performing tasks in UMHS Data Mart. The Home page is divided into sections that allow you to quickly begin a specific task, locate an object, or access technical documentation. It also includes sections that allow you to quickly access objects that you have recently viewed, created, or updated, and objects that are accessed the most often by the users assigned to the groups to which you belong.
What is the “Global Header?”

Located in the upper right-hand corner of UMHS Data Mart, the global header provides quick access to commonly used functions and is always available from the user interface.

For example, you can use the global header to begin a new task, search the Oracle BI Presentation Catalog, access the product documentation, or view a different object, without having to return to the Home page.
What are Favorites?

The favorites functionality allows you to bookmark as favorites the catalog objects that you view regularly or want to view again at another time. After you flag objects as favorites, you can use the "Manage Favorites dialog" to organize your favorites by creating categories and rearrange your favorites into the order that you find most intuitive. You can access a list of the objects that you marked as favorites and any categories that you created by clicking Favorites in the global header.
How do I access Dashboards?
Dashboards have the same look and feel, with a "tabular" design.
Can I select data on a Dashboard and copy it to an external source?

Place the mouse cursor outside the view and click, before dragging the mouse across the view to highlight the data you want to copy.

Use Control+C or Copy from the Edit menu or right mouse menu to copy the text to the clipboard.
How do I export data from a Dashboard?

Click the “Export” link at the bottom of the dashboard, then select the format you want to export the data as.
What is the best method of printing reports?

Using Printable PDF or Printable HTML is the best method to print reports in UMHS Data Mart.

Select the “Page Options” drop-down list in the upper right corner of the screen next to the question mark and select “Print”, then either Printable PDF or Printable HTML.

NOTE: This method will print all fields on the dashboard, including prompt values.
Can I print in landscape?

Select the “Page Options” drop-down list in the upper right corner of the screen next to the question mark and select “Print”, then Printable HTML. Select “Print Preview.”

Change the report to “Landscape” by selecting the “Landscape” button.
What is the print link at the bottom of an Analysis?

This method will print what is on the “Compound” Layout of the Analysis, which will NOT including prompt values.
Is Help available in UMHS Data Mart?

Additionally, the “OBIEE 11g User Guide” can be located on the “Status” Dashboard.
How do I log off UMHS Data Mart?

Click “Sign Out” on the Global Header.
Advanced Analysis
Where are the Analysis (Reports/Queries) now located?

Analysis (Reports/Queries) can be accessed via "Catalog" link on the Global Header.

Open or search for Analysis (Reports/Queries) under "Browse/Manage".
Where are the Analysis (Reports/Queries) now located? (continued...)

Analysis (Reports/Queries) can also be accessed via “Open” link on the Global Header.
How can I find and edit an Analysis (Report/Query) in the Catalog?

- Analysis (Reports/Queries) can be found in the "Folders Pane."
- Analysis (Reports/Queries) can be modified in the "Definition Pane."

[Image of OBIEE 11g UMHS Data Mart Quick Reference with a screenshot of the OBIEE interface showing the Catalog pane with various Analysis (Reports/Queries) listed under 'Folders' and 'Definition'.]
Can I search for existing Analysis (Report/Query) in the Catalog?

Search for Analysis (Reports/Queries) with "Search" binoculars

Search for Analysis (Reports/Queries) with "Search" in Global Header
How can I create a new Analysis (Report/Query)?

**Catalog Page**
Select “Analysis” under the “New” drop-down

**Home Page**
Select “Analysis” under the “Create...” section

**Global Header**
Select “Analysis” under the “New” drop-down
What Is the Analysis Editor?

The "Analysis editor" lets you explore and interact with information by visually presenting data in tables, graphs, pivot tables, and so on. You can include the views that you create in an analysis for display in dashboards. You access the Analysis editor when you create (or edit) an analysis.
