The gallery is located at the south end of the Taubman Health Center, on the first level.
The gallery consists of one large case - 23” in depth x 46.5” in length x 29.5” in height, two large cases - 23” in depth x 46.5” in length x 22.5” in height, 
2 small taller cases - 17” in depth x 17” in length x 22.5” in height, and five small cases (one is in the main lobby) - 17” in depth x 17” in length x 16.5” in height.
Each case has a cherry wood display deck with a plexiglass cover and museum quality security screws.
To adequately fill this space, the artist must provide at least one 3D piece to fill each small case and enough work to adequately fill the large cases.
Work must arrive ready to install. Please use felt bumpers on pieces that might damage the case deck.
Please provide any specialized display stands.

Footprint - use to help determine number of pieces for exhibit

Elevation - use to determine height of pieces for exhibit

Drawing has approximate scale of 1/2” = 1’
