Thomas W. Wakefield, MD
Vascular Surgery

Clinical Team

David Allis, PA
*Inpatient Physician
Assistant*

Kathy Halabicky, ACNP
*Inpatient Nurse
Practitioner*

Ann Luciano, ACNP-BC
*Outpatient Vascular
Nurse Practitioner*

Clare Harris, NP-BC
*Outpatient Vascular
Nurse Practitioner*

Gabrielle Artymovich,
CVNP-BC
*Outpatient Vascular
Nurse Practitioner*

Zachary York, FNP-BC
*Outpatient Vascular
Nurse Practitioner*

Rachel Scheich, ACNP
*Outpatient Vascular
Nurse Practitioner*

Susan Young, BSN, RN
*SVA CCC Outpatient
Registered Nurse*

Raquel Clayton, BSN, RN
*SVA CCC Outpatient
Registered Nurse*

What should I bring to my appointment?

To expedite the care process and better serve you as our patient, please **bring** the following helpful medical information to your appointment:

- Medical Center Map
- List of all current medications and dosages
- Current list of medical diagnoses and surgeries
- Radiology images on disc and printed reports supplied by your local doctor
- Any forms you were asked to bring with you
 - Please fill these out before your appointment

How do I prepare for my appointment?

- Call (734) 615-0872 to create a patient portal account. This is important for your care and through this online (web, mobile device) platform you can receive information about your appointment, test results and communicate with your care team. There may also be health questionnaires for you to complete prior to your visit.

- On the day of your visit, be sure to take all your regular scheduled medications and have a good breakfast unless you were told not to eat before a test. We do suggest you bring a snack, especially if you are diabetic or if you have been instructed to not eat for testing.

What should I expect at my initial visit?

If you are being seen at the main hospital, parking can be a challenge so please plan for extra time to find parking. After you park, please follow the included map to locate your clinic location.

Plan to be in the clinic for 2 to 6 hours. A typical visit will include:

- pre-appointment testing — blood draw, ultrasound studies or ECG (a device used to record the electrical activity of the heart),
- the appointment with your provider
- post-appointment testing (if needed).

You may need to complete pre-appointment testing before you come for your visit. This gives your provider the opportunity to discuss results with you during your visit. If this is needed, we will let you know and assist you in finding a testing option close to your home.

Depending on the nature of your visit, there are times when you will meet with trainees and/or advanced practice providers before meeting your surgeon. After meeting with you, they will review your case with the vascular surgeon.

How do I get my medical test results?

If you have additional testing performed, you should expect to receive the test results via the patient portal. Your surgeon's office may contact you to review results of testing if the surgeon feels it is necessary. If you would like to speak to your care team, you can call **(888) 287-1082** to schedule time to review your results and discuss your future care with us.

What kind of education will I receive?

During your appointment you will receive a blue and gold education folder which includes information about your vascular disease and our contact information. Additionally, when you check out the staff will print an after-visit summary which may have additional information.

If you are having surgery, you may visit a preoperative clinic ((locations at Chelsea, Domino's Farms, Northville and Taubman Center) where a provider will give you specific written instructions for your surgery.

What support and resources are available?

- View the Vascular Surgery website for further information:
<https://www.umcvc.org/conditions-treatments/vascular-surgery>
 - View the Michigan Medicine Vascular Surgery Care Guides:
<https://www.med.umich.edu/1libr/CVC/Vascular/CareGuidesVascularSurgery.pdf> Online Patient Portal (MyUofMHealth.org)
 - Our online patient portal is a secure way to manage your health online, offering a 24/7 connection to Michigan Medicine and important health information.
 - To create an account, visit www.myuofmhealth.org
 - Follow the instructions on the web site to set up an account.

We look forward to working with you and your family!

Sincerely,

The Vascular Surgery Program Staff
