8-Liter Colonoscopy Bowel Prep Instructions
PEG/Electrolyte-Generic, NuLYTELY®, GoLYTELY®, and CoLyte® (Arabic)

Refer to this instruction sheet for the entire week before your colonoscopy.

Colonoscopy prep instructions are extremely important for a successful colonoscopy. If you do not follow the instructions precisely, your bowels may not be ready for the procedure and you will need to repeat the procedure.

Planning for Your Colonoscopy

You must do a bowel prep. If you have not received a bowel prep, call the Endoscopy Call Center at (734) 936 - 9250 or toll-free at (877) 758 - 2626.

What is the name of your prep?

We recommend that you fill your prescription at least a week before your procedure.

You must have a driver with you at the procedure. You must have a driver who is 18 years or older present at check in and discharge. If you do not have a driver with you at check in, we will reschedule your appointment.

You can expect the procedure to take 3 to 4 hours. Please be sure to have a driver with you at all times, including during and after the procedure.

Medical Procedures Unit
Your entire procedure may take 3 to 4 hours to complete. Please tell your driver that they must remain at the colonoscopy appointment during your entire visit.

الرجاء ترك جميع المجوهرات والأشياء الشخصية في المنزل. إذا قمت بإحضار المجوهرات إلى موعدك فمن الممكن أن نطلب منك أن تنزعها.

Please leave all jewelry and personal items at home. If you bring jewelry to your appointment, we may have to ask you to remove it.

لا تلبس العدسات اللاصقة.

Please do not wear contact lenses.

If you have diabetes you must call your doctor

People with diabetes have special diet and medicine instructions. Call the doctor who ordered your colonoscopy for your special diet and medicine instructions.

If you need to reschedule

إذا كنت بحاجة إلى إعادة جدولة

Call (734) 936 - 9250 or toll-free (877) 758 - 2626.

الجدول الزمني لإعداد تنظير القولون

كيف سيتم تحديد جدول الإعداد لتنظير القولون الخاص بي؟

How will I determine my colonoscopy prep schedule?

سوف يساعدك الجدول الزمني أدناه على تحديد أي يوم من الأسبوع لبدء الإعداد. استخدام فم تضليل أو وضع دائرة حول الصف الصحيح لتحديد اليوم الذي سيتم بدء عملية الإعداد. وستبدأ عملية الإعداد في بداية اليوم.
The timeline table below will help you determine which day of the week to start your preparation. Use a highlighter or circle the correct row to determine which day you will start the prep. The prep process will begin at the start of the day.

If you reschedule your appointment, you must redo the timeline table to match your new date.

Fill in the day according to the timeline table

- Do not stop your aspirin.
- If you take a blood thinner, tell the doctor who ordered your colonoscopy. If you are unsure that you are taking blood thinners, please contact your doctor.

Stop taking any iron supplements, such as ferrous sulfate or polysaccharide iron complex.

Before Colonoscopy:

**Day: 3 days before your colonoscopy**

**Day: 2 days before your colonoscopy**

**Day: 1 day before your colonoscopy**

**Day: Your procedure day**

### Day: 3 days before your colonoscopy

- Fill in the day according to the timeline table

Stop eating popcorn, corn, beans, nuts, fruits with small seeds, tomatoes and celery.

### Day: 2 days before your colonoscopy

- Fill in the day according to the timeline table

No solid food from now until your procedure is done. Begin a clear liquid diet (below). Drink at least 8 glasses of water during the day to avoid dehydration.

- Mix your prep solution with lukewarm water. You may chill it for at least 5 hours to make it easier to drink, or, you can drink it at room temperature.

- Between 5 and 6 pm: drink one 8-ounce glass of PEG/Electrolyte-Generic, NuLYTELY, GoLYTELY, or CoLyte solution and continue drinking one 8-ounce glass every 15 minutes until 2 liters (64 ounces) of the prep solution is gone. If you follow the instructions exactly, you should be done with the first 2 liters (64 ounces) of prep.

### Day: Your procedure day

- Stay near a toilet, as you will have diarrhea.

### You may drink these clear liquids:

- "Gatorade" (Gatorade, Crystal Light Lemonade®)
- "Powerade" (Powerade®)

### Do not drink these liquids:

- Alcohol
- Milk or non-dairy creamer
- The sugarless coffee drink
- The unflavored drink
Before the colonoscopy:

1. Continue the clear liquid diet throughout the day. No solid foods.
2. In the morning, drink one 8-ounce glass of PEG/Electrolyte-Generic®, NuLYTELY®, GoLYTELY®, or CoLyte® solution and continue drinking one 8-ounce glass every 15 minutes until 2 liters (64 ounces) of the prep solution is gone.
3. Between 5 and 6 pm: drink another 2 liters (64 ounces) of the prep solution over the course of 2 hours.

Day: The day before your colonoscopy

Fill in the day according to the timeline table

Note: Nothing Red or Purple

- Any liquid you cannot see through
- Hard candy
- Note: Nothing Red or Purple
- Coffee or tea (black only)
- Carbonated or non-carbonated soda
- Fruit-flavored drinks
- Apple juice, white cranberry juice or white grape juice
- Jell-O or popsicles
- Broth

The day of your colonoscopy (starting at 12 am midnight)

- No solid foods, broth or Jello.

- The day of your colonoscopy (starting at 12 am midnight)
- No solid foods, broth or Jello.

5 hours before leaving home for your colonoscopy

Day/Time: 5 hours before leaving home for your colonoscopy

Fill in the day according to the timeline table

- You may have to wake up early.
- You may have to wake up early. Begin drinking the final 2 liters (64 ounces), the same way you drank the previous 6 liters (192 ounces), i.e.: drink an 8-ounce glass every 15 minutes until the final 2 liters (64 ounces) are gone. If you drink according to schedule, you will finish drinking 3 hours before leaving home.
- Take your morning medications with a small amount of water 4 hours before your appointment time (unless you have been told otherwise). If you take Diabetes medications follow your doctor's instructions.
- If you followed all of the instructions, your stool will be a clear or yellow liquid and you are ready for your colonoscopy.

If your stool is formed or your preparation is not going as expected call (734)936-9250 or toll-free (877) 758-2626. After business hours, on weekends or holidays call the paging operator at (734) 936-6267 and ask to speak with the GI doctor on call.

Important!

If you followed all of the instructions, your stool will be a clear or yellow liquid and you are ready for your colonoscopy.

If your stool is formed or your preparation is not going as expected call (734)936-9250 or toll-free (877) 758-2626. After business hours, on weekends or holidays call the paging operator at (734) 936-6267 and ask to speak with the GI doctor on call.

 Colon cleansing tips:

1. Stay near a toilet! You will have diarrhea, which can be quite sudden. This is normal.

Try drinking the solution with a straw. It may be easier to tolerate.

2. Rarely, people may have nausea or vomiting with the prep. If this occurs, give yourself a 30-minute break, rinse your mouth or brush your teeth, then continue drinking the prep solution.

You may have bowel cramps until the stool has flushed from your colon (this may take 2 to 4 hours and sometimes much longer).

3. Anal skin irritation or a flare of hemorrhoid inflammation may occur. If this happens, treat it with over-the-counter-remedies, such as hydrocortisone cream, baby wipes, Vaseline®, or TUCKS® pads. Avoid products containing alcohol. If you have a prescription for hemorrhoid cream, you may use it. Do not use suppositories.

When should I call the call center?

If you have been ill and have had any of the following symptoms within 48 hours of your appointment, please call the call center at (734) 936-9250:

- Fever greater than 100.6
- Chills or fever greater than 100.6
- Sore throat (which may persist for several days)
- Diarrhea
- Vomiting

If you have been ill and have had any of the following symptoms within 48 hours of your appointment, please call the call center at (734) 936-9250:
• Productive cough (where your cough is producing phlegm)
• Diarrhea
• Vomiting (not related to taking the bowel prep)
Before starting the procedure, a member of our team will ask you to sign an informed consent indicating that you understand the procedure, its benefits and risks, and the alternatives for a colonoscopy. Read this handout or view the video at: http://michmed.org/EXL6d to understand your informed consent.

What is the purpose of a colonoscopy?

Colonoscopy is a procedure in which a doctor inserts a thin tube into the anus to look inside your rectum and colon. Colonoscopy can show irritated and swollen tissue, ulcers, polyps, and cancer.

What are the benefits of a colonoscopy?

Colonoscopy exams can find cancers at earlier stages, and polyps can be found and removed before they become cancerous. This greatly improves the chances for treating colorectal cancer successfully and reduces the chance that a person will die from colorectal cancer.

What are the risks of a colonoscopy?

In a study of 4–8 out of 10,000 patients, complications emerged after colonoscopy procedures. These complications included:

- Bleeding. Severe bleeding is found in patients who had the colon or polyps removed and can cause death when the volume is larger than 2 cm.
- Perforation or spasm in the colon or the polyps (rupture).
A study of screening colonoscopies found that between 4 to 8 people in 10,000 have a serious complication after a colonoscopy. Serious complications include:

- Bleeding. Most cases of bleeding occur in patients who have polyps removed. The risk is higher for polyps that are larger than 2 cm.
- A tear or a hole in the colon or rectum wall (perforation).
- Infection.
- Aspiration that may lead to a lung infection (pneumonia).
- A reaction to the sedating medication, including breathing or heart problems.

Risks are higher in people taking steroids or anti-coagulation medicines, or in people that have significant underlying diseases. There is also a risk that cancer or polyps will not be detected.

What are the alternatives?

There are other screening tests that may detect abnormalities in the colon and rectum but colonoscopy is the only method that enables the doctor to take a sample tissue and/or remove polyps during the procedure. This reduces the need for additional tests and surgeries.
