May Thurner Syndrome/Left Iliac Vein Compression with Clot (Thrombus) and Stent Repair

A. Diagram showing normal blood flow from inferior vena cava to aorta, through right iliac artery and left iliac vein.

B. Diagram showing left iliac vein compressed under right iliac artery, leading to restricted blood flow. Clots may form in the iliac vein as blood flow is restricted.

C. Diagram showing inflated balloon within stent after treatment of the clot.

D. Diagram showing catheter in left iliac vein with guidewire for catheter insertion and inflated balloon within stent after treatment of the clot.
