

## Contact list for pharmacy specialists that can help manage Paxlovid drug-drug interactions

**Background:** The COVID treatment guideline will direct prescribers to call their ambulatory clinic pharmacist or the ID team for help in managing interactions. This contact list will be provided to the ambulatory pharmacists, ID pharmacists, and ID physicians, and will NOT go to all providers.

**Availability:** Pharmacy specialists are available M-F from approximately 0700 - 1600. Assistance can NOT be guaranteed during evenings and weekends. However, many of our specialists routinely check emails during off hours and may provide feedback.

Sub-specialty	Contact	Preferred Contact Method
Pain	Mike smith	Page (32740) M-F 8-5. Email during off hours
Peds	Karen Davidge	Skype or Page (61641) M-F 8-5. Email during off hours
Psych	Amy Vandenburg	Page (34864) M-F 8-5. Email during off hours
Cardiology	Variable. Contact Kristen Pogue who will triage.	Page (5260) M-F 7am-4pm. Email during off hours
Oncology	Variable. Contact Rachel McDevitt who will triage.	Skype or Page (35074) M-F 8-4. Email during off hours
Transplant	Variable	Send message to MiChart pool (See list below). Messages are evaluated 7am-3:30pm M-F. For weekend help, please contact ID pharmacy (31888), and send MiChart pool note to transplant. ID can help provide a temporary plan over the weekend, and transplant can adjust as needed on Monday.
