UMSkinCheck

Self-skin examination is the key to early detection of skin cancer, including melanoma.

To help, the University of Michigan Medical School has developed this free app for the iPhone and iPad.

- ### UMSkinCheck Features
- Guidance on performing a skin cancer self-exam and full body photographic survey.
 - Tracking detected skin lesions and moles for changes over time.
 - Notifications/reminders to perform self-exams on a routine basis.
 - Storage of photos for baseline comparisons during routine follow-up self-exams.
 - Information on skin cancer

- Version # - 1.1
- Requirements - iPhone 3 or higher, iPad 2 or higher, iPod Touch 4th generation or higher, iOS version 4.0 or higher.
- For more information: www.uofmhealth.org/umskincheck
- Free download using QR code or from: <http://mobileapps.umms.med.umich.edu/q/umskincheck>
