These guidelines will be updated as the situation changes.

Michigan Medicine is clarifying our new visitor restrictions, effective Monday, March 23, 2020, as part of our commitment to protect our patients and employees from the spread of diseases. These important, temporary changes will help us minimize the number of people in the hospital and keep risk of infection low.

**All routine visiting is temporarily suspended**

to protect our staff, patients, and community during the outbreak of COVID-19.

In our emergency departments, extremely limited exceptions will be applied in certain circumstances which could include:

| Adult Emergency Services | One visitor will be allowed per patient.  
If not essential to the patient’s ongoing care, the visitor will be asked to leave after screening and initial evaluation, and return when the patient is discharged. |
|--------------------------|---------------------------------------------------------------------------------------------------|
| Children’s Emergency Services | One adult primary caregiver will be allowed per pediatric patient.  
It is preferred that one caregiver be designated for the entire stay to support the child’s medical care and who then must stay in the room for the duration of the visit. No siblings or extended family. |
| Psychiatric Emergency Services | One visitor will be allowed per patient 18 years of age and older.  
If not essential to the patient’s ongoing care, the visitor will be asked to leave after screening and initial evaluation, and return when the patient is discharged.  

One adult primary caregiver will be allowed per patient 17 years of age and younger.  
It is preferred that one caregiver be designated for the entire stay to support the child’s medical care and who then must stay with the patient for the duration of the visit. No siblings or extended family. |

**No visitors are allowed to wait in the waiting room or other locations in the hospital.**

**All Visitors will be screened upon arrival and must not have any symptoms of illness.**
